Equity - women and men come from different starting points due to historical and ongoing inequitable gender relations

Equality - women and men have equal rights, opportunity and status

## Questions

How do we plan for the inevitable push back against equality for women and associated implications for poverty reduction and human well-being?

To achieve equality, which institutions require adjustment and which require a complete restructure?

What are the goals for the CGIAR gender platform in 5 and 10 years from now?

Is there anything the donor community has missed or can amplify?
