Capacity Development in CGIAR

Alain Vidal

CSE-HR joint meeting – June 2014

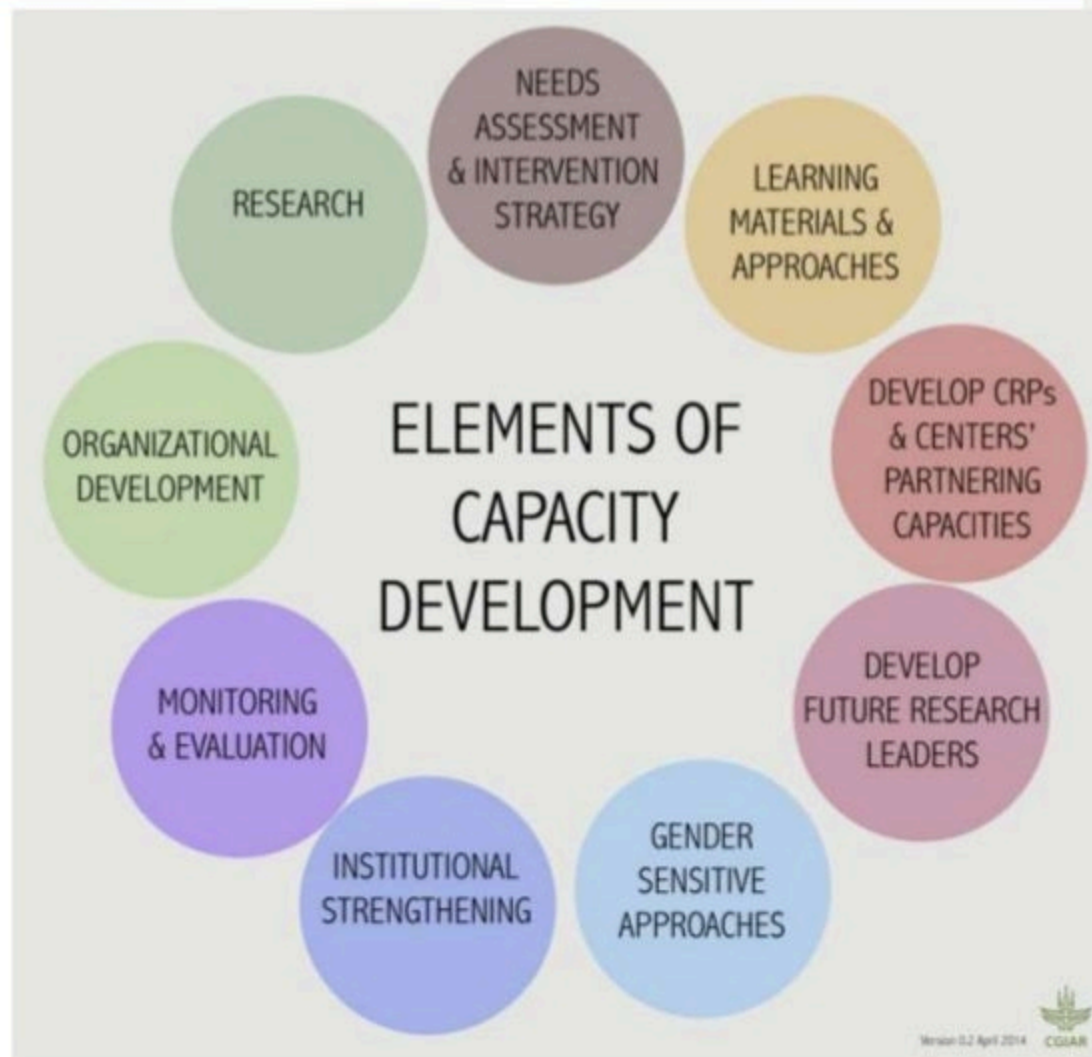

Capacity development

Our value proposition

- Capacity development is a crucial and strategic enabler in the journey from research outputs to development outcomes
- Successful capacity development enhances the ability of both CGIAR and its partners to navigate the complex reform process
- Across multiple levels – individual, organisational and institutional – wider than the mere transfer of knowledge and skills through training

Key elements and cooperation opportunities with CRPs

What do we aim for with these elements?

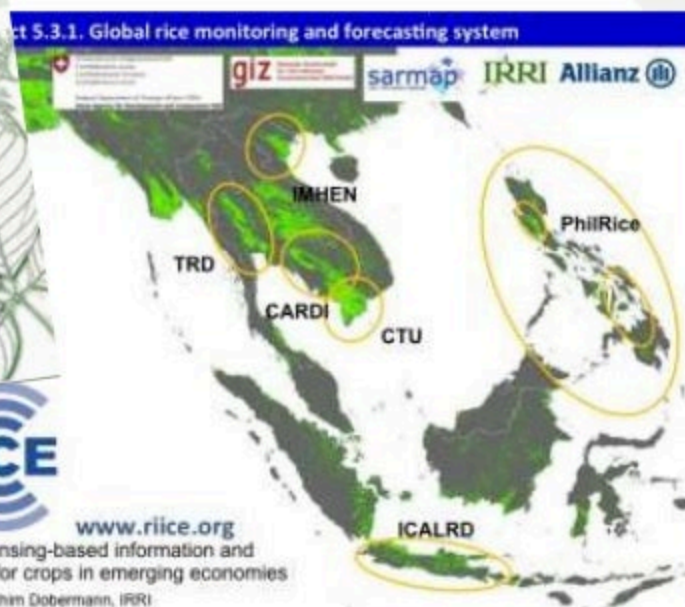

- Needs assessment and intervention strategy
 - The right interventions for the right audience

- Innovative learning materials and approaches (gender)

hip for a food secure future

Consortium

What do we aim for with these elements?

- Develop our capacity to partner
 - Who are the best partners to achieve outcomes?
 - Can we trigger development to finance research?

- Future research leaders
 - Talent management
 - Fellowship Programs

What do we aim for with these elements?

- Institutional strengthening
 - Advising decision makers on legislation / innovation
 - Advocacy / policy dialogues
 - Managing risks: financial, contractual, reputational
- Research on capacity development
 - Action- and participatory-research

A CapDev Community of Practice to help CRPs prepare their 2nd round

CGIAR is a global research partnership for a food secure future

Discussion

- What are your own success stories on those CD elements?
- What do you see as critical pathways?
